E-LEARNING ON PUBLIC FINANCE FOR SOCIAL PROTECTION ANALYSTS

OVERVIEW

SNAPSHOT OF THE COURSE

Many countries across the globe are increasingly recognising the contribution that social protection systems make to sustainable economic and social development. Yet a central challenge remains how to finance such systems in the context of a diverse array of other priorities for government spending at a national level. By bringing together the worlds of public finance and of social protection, this course aims to equip social protection and public finance practitioners with the practical skills to assess financing options for social protection and develop tailored country financing plans.
